

Week 7

Team project update/progress

Table of Contents

- 01 Weekly Progress Summary
- 02 UI Updates/Improvements
- 03 Overleaf
- 04 Next Steps

Weekly Progress Summary

Area	Progress Made
UI Fix	8 out of 11 issues in the code fixed
UI Improvements	Scrollbars added in order to allow the panels to flow within the full UI Panel layout and not overlap
Overleaf	Learned how to work with Overleaf and started creating the research paper
Website and Files	The website is up to date and every file is uploaded on OneDrive

UI Improvements and Fixes

- a) Changed [AntiCopyPaster] to [CLONE] in function: showWaitingState (waiting state of the panel had not been altered)
- b) Removed extra “?” from help button in actionPanel
- c) Shifted text in function: CloneOcurranceDialog, aligning it to its label to the west of the dialog
- d) Removed “Confidence: Pending” in the dropdown label since Dhir’s confidence section already takes care of that
- e) Wrapped suggestion panel in a JScrollbar, adding scrollbars to the tool window that permits the user to see all of the content without compromising space and visibility.
- f) Fixed createActionPanel layout bugs, which made the buttons stay to the right of the statusLabel. Buttons now remain below everything.
- g) Replaced string arrow (“v”, “>”) in "Details & Provenance" dropdown with an IntelliJ dropdown arrow Icon.
- h) Reduced top description spacing in order to make more space for the more user interactive features and provide an overall cleaner look to the panel.

Overleaf Progress

Abstract

- Added the Abstract of the paper
 - Described the CLONE plugin and its features
- Introduced the goal of the research project

Introduction

- Showcased why CLONE is important to develop
- Explained how the CLONE plugin functions
- Gave a brief overview of the changes introduced
- Walked the audience through the layout of the paper

New Features

- Describes all new features we introduced on our research project using images

Problem Statement

- Describes in a more detailed manner the issues with previous iterations of CLONE, then discusses what we changed

Overleaf Progress

Multiple Clone Dialog

- Added the Multiple Clone Dialog subsection
- Introduced the popup that appears when the plugin detects multiple clones
 - Discussed the changes made to the occurrence popup

Explanation

- Added the Explanation subsection
- Explained the objective of the Explanation section, what informations it should have and why it matters

Diff Preview

- Added the Diff View subsection
 - Described the features and importance of the Diff View
 - Raised the current complications with Diff preview and introduced the alterations made

AI Trust Panel

- Added the AI Trust subsection
- Explained the five equally weighted validation stages
 - Documented verified, pending, and failed states

Action Buttons

- Documented the improved Edit action
- Explained when the Apply button is disabled
 - Described the human-in-the-loop workflow

Next Steps

Last 3 Issues

Making final fixes using tokens bought last week to view the changes on the panel

Overleaf

Finish up the research paper on Overleaf;
Expand existing sections;
Add workflow section;
Add images (each section separately and the whole UI panel).

Website and Files

Keep updating and uploading everything.
